

Stohill Properties ERP

User Acceptance Test Scripts

Version 1.0 - 30 September 2026

Run by each department before go-live. A module is accepted when all its scripts pass and every Critical/High defect is fixed and retested.

How to use this pack

Where to test. Use a test copy of the system restored from a recent backup, never live data. Online payments use the test gateway in UAT; do one small live Paynow payment in pre-production.

Who. Each script names the role that runs it. Where two people are named (e.g. A and B), use two different logins: several controls check that the same person cannot both create and approve.

Recording. Tick Pass or Fail for every step. On a Fail, write what happened and a defect reference (e.g. D-012) and log it in the defect log at the back, with screenshots where possible.

Severity. Critical - wrong figures posted to the ledger, data visible to the wrong person, or a process cannot be completed. **High** - a process needs a workaround. **Medium** - incorrect display or message, no wrong data. **Low** - cosmetic.

Order. Run Access and security first, then the modules in the order of this pack, then the month-end walkthrough, which exercises everything together.

Summary

Section	Scripts	Owner	Result
Access and security	SEC-01, SEC-02, SEC-03		
General ledger and period end	GL-01, GL-02, GL-03, GL-04		
Accounts receivable	AR-01, AR-02, AR-03, AR-04		
Purchasing and accounts payable	PUR-01, PUR-02, PUR-03, AP-01		
Banking and reconciliation	BNK-01, BNK-02		
Property and rentals	REN-01, REN-02, REN-03, REN-04, REN-05		
Sales, commissions and projects	SAL-01, PRJ-01		
Payroll and fixed assets	PAY-01, FA-01		
Tenant portal	POR-01, POR-02, POR-03		
Operations (IT)	OPS-01, OPS-02		

Access and security

SEC-01	Sign in, sign out and failed logins	Run by: Any staff user	Tester:	Date:
---------------	--	-------------------------------	----------------	--------------

Before you start: A staff login exists.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Open the site and sign in with your email and password.	The Command Center dashboard opens. The login form was empty when the page loaded.		
2	Sign out from the sidebar.	You return to the login page. Pressing Back does not show ERP data.		
3	Sign in with a wrong password.	"Invalid credentials" is shown; no access.		
4	Try a wrong password more than 10 times within a minute.	Further attempts are refused for a short time (rate limit).		

SEC-02	Module access follows the role	Run by: System administrator + a test user	Tester:	Date:
---------------	---------------------------------------	---	----------------	--------------

Before you start: A role with only Rental Management access.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	In User Access Control (/user-access), create a user with that role and set their password.	User is created and appears in the user list with that role.		
2	Sign in as the new user.	The sidebar shows only the modules of the role.		
3	Type a finance address in the browser, e.g. /finance/ap.	No finance data loads (access denied / empty); nothing can be saved.		

SEC-03	Maker/checker on journal batches	Run by: Two finance users (A and B)	Tester:	Date:
---------------	---	--	----------------	--------------

Before you start: Both have GL access.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	User A creates a journal batch and submits it for approval.	Batch shows "pending approval".		
2	User A tries to approve it.	Refused: the maker cannot approve their own batch.		
3	User B approves it.	Batch posts; entries appear in the trial balance.		

General ledger and period end

GL-01	Manual journal and reversal	Run by: Accountant	Tester:	Date:
--------------	------------------------------------	---------------------------	----------------	--------------

Before you start: An open period.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Finance > GL > New journal: Dr an expense, Cr bank, equal amounts, with a narration.	Journal saves; totals balance.		
2	Try to save a journal whose debits and credits differ.	Refused with an "unbalanced" message.		
3	Post the balanced journal (through approval if required).	Trial balance shows the amounts on both accounts.		
4	Reverse the posted entry.	A reversing entry is created; both accounts return to their prior balances.		

GL-02	Cost centres and reports	Run by: Accountant	Tester:	Date:
--------------	---------------------------------	---------------------------	----------------	--------------

Before you start: At least one cost centre (Finance Settings > Cost Centres).

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Post a journal with a cost centre on the expense line.	Entry posts.		
2	Reports: run the P&L; filtered by that cost centre.	Only lines with that cost centre are included.		
3	Run Trial Balance, Balance Sheet, Cash Flow and GL Detail for the month; export one to CSV.	Balance sheet balances; the cash-flow check matches bank movement; CSV opens in Excel.		

GL-03	Recurring journal	Run by: Accountant	Tester:	Date:
--------------	--------------------------	---------------------------	----------------	--------------

Before you start: None.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Finance Settings > Recurring Journals > New template: monthly accrual, first run today, "Reverse next period" ticked.	Template saves; Dr and Cr totals shown equal.		
2	Click "Run due now".	A message reports 1 recurring entry; the entry exists in draft (or posted if auto-post).		
3	Check next run date on the template.	Moved forward one month.		

GL-04	Close a period	Run by: Finance manager	Tester:	Date:
--------------	-----------------------	--------------------------------	----------------	--------------

Before you start: A test period with no further activity expected.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Fiscal Periods: close the period.	Period shows closed.		
2	Try to post a journal dated in that period.	Refused: the period is closed.		

Accounts receivable

AR-01	Invoice, PDF, email and aging	Run by: AR clerk	Tester:	Date:
--------------	--------------------------------------	-------------------------	----------------	--------------

Before you start: A customer with an email address.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Accounts Receivable: create an invoice with two lines and VAT; post it.	Invoice posted; the page total "Outstanding customer balances" increases by the invoice total.		
2	Download the invoice PDF.	A real PDF with your company details and the lines.		
3	Email the invoice.	Success message; the customer receives the email with the PDF.		
4	Reports > AR Aging.	Invoice appears in the correct age bucket.		

AR-02	Receipt applied to chosen invoices	Run by: AR clerk	Tester:	Date:
--------------	---	-------------------------	----------------	--------------

Before you start: Customer has two open invoices.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Record and post a receipt smaller than the two invoices together.	Receipt posts to the bank account.		
2	Open the receipt > Apply to invoices > "Oldest first" > Apply.	The oldest invoice is paid first; the rest goes to the next; unapplied shows 0.		
3	Check allocation history on the receipt.	Each allocation listed with amount and journal reference.		

AR-03	Credit note, write-off and refund	Run by: AR clerk + finance manager	Tester:	Date:
--------------	--	---	----------------	--------------

Before you start: An open invoice; a receipt with an unapplied balance.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Create an invoice with Document Type = Credit note; post it; apply it to the open invoice.	Invoice balance reduced by the credit; VAT return shows the credit.		
2	Write off a small remaining balance with a reason.	Invoice closed; amount posted to bad debts.		
3	Refund the unapplied receipt balance to the customer.	Refund posted from the bank; unapplied balance becomes 0.		

AR-04	Statements and foreign currency	Run by: AR clerk + accountant	Tester:	Date:
--------------	--	--------------------------------------	----------------	--------------

Before you start: An exchange rate for a second currency (e.g. ZWG).

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Customer row > Statement.	PDF statement for the last 90 days with opening and closing balances.		
2	Post an invoice in the second currency; receive payment after the rate changes.	Realised exchange gain/loss is posted automatically.		
3	Finance Settings > FX Revaluation for month end.	Open foreign items listed with gain/(loss); entry posts and shows its reversal date.		

Purchasing and accounts payable

PUR-01	Purchase order approval	Run by: Buyer (A) + approver (B)	Tester:	Date:
---------------	--------------------------------	---	----------------	--------------

Before you start: Finance Settings > Approval Rules: Purchase order from 1,000, approver role = B's role.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Purchasing > New Purchase Order (A): supplier, 2 lines over 1,000 total; save draft.	PO created as draft with a PO- number.		
2	A clicks Issue.	Refused: approval is required.		
3	A tries to approve in the approval box.	Refused: the creator cannot approve.		
4	B approves; A issues.	Status Issued.		

PUR-02	Goods receipt and 3-way match	Run by: Stores + AP clerk	Tester:	Date:
---------------	--------------------------------------	----------------------------------	----------------	--------------

Before you start: An issued PO.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Receive goods for part of one line (goods received note).	GRN- number shown; received quantity updated; status Partially received.		
2	Try to receive more than ordered.	Refused.		
3	"Invoice received goods" with the supplier's invoice number.	Draft supplier invoice created for the received quantity only.		
4	Post that invoice in Accounts Payable.	Posts; match status shows no exceptions.		

PUR-03	Match exception and override	Run by: AP clerk (A) + finance manager (B)	Tester:	Date:
---------------	-------------------------------------	---	----------------	--------------

Before you start: A PO-linked draft invoice.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Edit the invoice price more than 2% above the PO price; try to post.	Refused: 3-way match failed, with the reason.		
2	A tries to override the match.	Refused: someone else must override.		
3	B overrides with a reason; A posts.	Posts; the override and reason are recorded on the invoice.		

AP-01	Supplier invoice and payment approvals	Run by: AP clerk + approver	Tester:	Date:
--------------	---	------------------------------------	----------------	--------------

Before you start: Approval rules for supplier invoice and supplier payment.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Enter and approve a supplier invoice; post it.	Posting blocked until approved; then posts.		
2	Create a payment; approve it; post it; apply it to the invoice.	Invoice paid; payment unapplied balance 0; AP aging reduced.		
3	Enter a supplier credit note and apply it to another invoice.	Invoice balance reduced.		
4	Supplier > Statement PDF.	Statement shows the invoices, payment and credit.		

Banking and reconciliation

BNK-01	Statement import	Run by: Accountant	Tester:	Date:
---------------	-------------------------	---------------------------	----------------	--------------

Before you start: A bank account linked to its GL account. A CSV from your bank with a header row: date, description, reference and either amount (money in positive) or debit and credit columns. Dates as YYYY-MM-DD or DD/MM/YYYY.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Bank & Cash > Upload statement for the account.	Lines imported; count shown.		
2	Upload the same file again.	Duplicates are skipped; no double lines.		

BNK-02	Reconcile	Run by: Accountant	Tester:	Date:
---------------	------------------	---------------------------	----------------	--------------

Before you start: Imported statement with lines that match posted receipts/payments, plus a bank charge.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Add a reconciliation rule (e.g. keyword "CHARGES" auto-post to bank charges); run auto-match.	Matching lines matched; the charge line posted automatically.		
2	Match a remaining line manually to its ledger line; then undo and redo it.	Match, undo and redo work; one ledger line cannot be matched twice.		
3	Post an adjustment for any other unmatched bank-only item.	Adjustment journal created and matched.		
4	Open the reconciliation report.	Difference is 0; outstanding items listed.		

Property and rentals

REN-01	New lease, deposit and billing	Run by: Rentals officer	Tester:	Date:
---------------	---------------------------------------	--------------------------------	----------------	--------------

Before you start: A property/unit and a tenant contact.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Create a lease and activate it.	Lease listed as active.		
2	Lease > Deposit: record the deposit.	Deposit shown as held in trust; trust bank and tenant deposits accounts updated.		
3	Lease > Recurring charges: add a service charge.	Charge listed with monthly amount.		
4	Lease > Billing > Bill now.	Invoice(s) created including rent and the charge; posted to AR.		

REN-02	Rent payment and arrears	Run by: Rentals officer	Tester:	Date:
---------------	---------------------------------	--------------------------------	----------------	--------------

Before you start: An unpaid rental invoice.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Record a rent payment against the invoice.	Invoice paid/partly paid; tenant balance reduced.		
2	Leave an invoice unpaid past the grace period and let the daily jobs run (or ask IT to run them).	Reminder sent; late fee invoiced and posted per the agreed terms.		

REN-03	Renewal, termination and deposit release	Run by: Rentals manager	Tester:	Date:
---------------	---	--------------------------------	----------------	--------------

Before you start: An active lease with a deposit and arrears.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Renew the lease with a new end date and rent.	A follow-on lease number is created; charges and deposit carried over.		
2	On another lease, Terminate early with a date mid-period.	Credit notes raised for billed periods after the date; short notice flagged if applicable.		
3	Release deposit, applying part to arrears.	Arrears settled from the deposit; the rest refunded.		

REN-04	Maintenance to contractor bill and recharge	Run by: Rentals officer	Tester:	Date:
---------------	--	--------------------------------	----------------	--------------

Before you start: A contractor set up as a supplier.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Log a maintenance ticket; later click Complete job with contractor, actual cost, invoice number, Recharge tenant ticked.	Ticket completed; message names the supplier bill and the tenant recharge invoice.		
2	Check AP and AR.	Contractor bill in AP; recharge invoice on the tenant in AR.		

REN-05	Owner (landlord) trust account	Run by: Finance officer	Tester:	Date:
---------------	---------------------------------------	--------------------------------	----------------	--------------

Before you start: A managed property with an owner and collected rent.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Rental Management > Owners.	Owner shows held in trust, not yet collected, and available to pay.		
2	Download the owner statement.	PDF lists rent, management fee and any repairs.		
3	Pay out more than "available to pay".	Refused.		
4	Pay out the available amount from the trust bank account.	Payout posted; available becomes 0.		

Sales, commissions and projects

SAL-01	Brokered sale and agent commission	Run by: Sales admin + finance	Tester:	Date:
---------------	---	--------------------------------------	----------------	--------------

Before you start: A listed property, buyer, seller and agent.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Record a brokered sale; confirm the deal; post to finance.	Only the agency commission is invoiced (to the seller); no cost of sale.		
2	Approve the agent commission.	Commission accrued using the commission structure split.		

PRJ-01	Development project cost and capitalisation	Run by: Project accountant	Tester:	Date:
---------------	--	-----------------------------------	----------------	--------------

Before you start: None.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Development Projects > New Project with a budget; capitalise to inventory, linked property.	Project created with its own cost centre.		
2	Raise a PO for the project and receive it.	Cost report shows the open commitment.		
3	Invoice and post it.	Cost to date rises; amount held in Work in Progress (1540).		
4	Capitalise WIP (all).	Journal posted; property cost price increased; project completed.		

Payroll and fixed assets

PAY-01	Payroll run and statutory figures	Run by: Payroll officer (A) + approver (B)	Tester:	Date:
---------------	--	---	----------------	--------------

Before you start: Two test employees with contracts; one with income above the top PAYE bracket.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Payroll > New run for the month; Process.	Run shows gross, deductions and net.		
2	Compare PAYE, AIDS levy, NSSA (employee and employer) and ZIMDEF with a manual calculation for both employees.	Figures agree with current ZIMRA/NSSA rates.		
3	A clicks Approve.	Refused: the person who processed the run must not approve it.		
4	B approves; download the bank payment file; email payslips; Pay all.	CSV lists net pay per employee; payslips received; run Paid; GL entries posted.		

FA-01	Asset lifecycle	Run by: Accountant	Tester:	Date:
--------------	------------------------	---------------------------	----------------	--------------

Before you start: An asset category.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Add an asset; run depreciation for a month.	Depreciation posted once (statutory book only); NBV reduced.		
2	Dispose of the asset with proceeds.	Gain or loss on disposal posted; asset closed.		

Tenant portal

POR-01	Invite and activate	Run by: Rentals officer + a tenant tester	Tester:	Date:
---------------	----------------------------	--	----------------	--------------

Before you start: Tenant contact with a real test email address.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	CRM contact (type tenant) > Invite to portal.	Message: invitation emailed. Staff never see the link.		
2	Tenant opens the email link, sets a password.	"Your account is ready".		
3	Tenant signs in.	Lands on the tenant portal (not the ERP). Typing /dashboard sends them back to the portal.		

POR-02	Tenant self-service	Run by: Tenant tester	Tester:	Date:
---------------	----------------------------	------------------------------	----------------	--------------

Before you start: Tenant has invoices and an active lease.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Check Home, Invoices (download a PDF), Statement (PDF).	Only the tenant's own leases and invoices; balances match the ERP.		
2	Log a maintenance request.	Reference shown; the ticket appears in the staff Maintenance tab.		
3	A second tenant tries to open the first tenant's invoice PDF link.	Refused / not found.		

POR-03	Online payment	Run by: Tenant tester + finance	Tester:	Date:
---------------	-----------------------	--	----------------	--------------

Before you start: UAT: test gateway. Pre-production: live Paynow with a small real amount.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Select two open invoices > Pay online; complete the payment.	Returned to the payment page: "Payment received".		
2	Refresh the payment page several times.	Still one receipt only (no double posting).		
3	Staff check AR / rentals.	Receipt posted to the online-payments bank account; invoices paid.		
4	Start a payment and cancel it at the gateway.	Shows "Payment was not completed"; invoices remain open.		

Operations (IT)

OPS-01	Backups and restore drill	Run by: IT	Tester:	Date:
---------------	----------------------------------	-------------------	----------------	--------------

Before you start: Production-like server.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Check the backup service is healthy and a dump from today exists in BACKUP_DIR.	Healthy; file present; LAST_STATUS starts with "ok".		
2	Confirm the backup folder is copied off the server.	Copy exists in the off-site location.		
3	Restore the latest dump into a scratch database and count users/journal entries.	Restore succeeds; counts match production.		

OPS-02	Scheduled jobs and monitoring	Run by: IT	Tester:	Date:
---------------	--------------------------------------	-------------------	----------------	--------------

Before you start: SENTRY_DSN and an uptime monitor configured.

#	Action	Expected result	Pass / Fail	Notes / defect ref
1	Check scheduler logs the morning after the first night.	Billing, overdue, depreciation and recurring journal jobs ran without errors.		
2	Stop the api container briefly.	Uptime monitor alerts on /api/v1/health/; clears when restarted.		
3	Ask a developer to trigger a test error.	The error appears in Sentry with no personal data.		
4	Send a test email (e.g. a payslip) from the live system.	Delivered via SMTP, not only to the logs.		

End-to-end month-end walkthrough

Run one complete month in the test copy with real (anonymised) volumes. This is the final check that the modules work together.

#	Month-end task	Done by	Date	OK?
1	Bill rent (automatic daily job) and review the invoices raised.			
2	Import all bank statements and reconcile every bank account to a zero difference.			
3	Allocate every receipt and supplier payment; clear unapplied cash.			
4	Match and post all supplier invoices (3-way match for PO purchases).			
5	Process, approve and pay payroll; remit PAYE/AIDS levy, NSSA and ZIMDEF from the statutory summary.			
6	Run depreciation and recurring journals (automatic) and review them.			
7	Run FX revaluation at the month-end rate.			
8	Pay owners their available balances and send owner statements.			
9	Review AR/AP aging, the VAT return and budget vs actual.			
10	Close the period; confirm postings into it are refused.			
11	Run Trial Balance, P&L, Balance Sheet and Cash Flow; the balance sheet balances and the cash flow agrees to bank.
